Fishing regulations 2025

Angling in the department of Doubs is subject to specific regulations, depending on the waterway on which it is carried out.

There are essentially **three main classes**:

- Private category 1 waterways.
Example: Cusancin, Dessoubre, Haut Doubs, Loue...
- Private category 2 waterways.
Example: Doubs middle course, Ognon, Savoureuse...
- Public category 2 waterways and canals.
Example: Doubs middle course, Rhône-Rhine Canal...

And three specific cases:

- A public category 1 section on the Loue River (Arc-et-Senans section).
 - Two category 2 hydroelectric reservoirs ('classified as public' as far as fishing is concerned): Vaufrey and Poset Lakes.
 - A section governed by an international convention named 'Doubs frontière' (Doubs border) (between Villers-le-Lac and Clairbief and upstream from Bremoncourt).
- All of these regulations are available on our website.
- Should you have any doubts regarding regulations, please consult the Géopêche website or contact the Federation.

The following information is a summary of the main texts in existence, taken from the French Environmental Code and the Permanent Regulatory Order concerning freshwater fishing in the department of Doubs.

Internal regulations or specific fishing regulations cannot substitute the general regulations presented in this document.

The Federation shall not be held responsible for this information.

Fishing conduct and methods

In category 1, members of an AAPPMA can fish using:

- 1 line in private waters.
- 2 lines in public waters (Arc-et-Senans section of the Loue River only).

In category 2, members of an AAPPMA can fish using:

- 4 lines in private waters.
- 4 lines in public waters.
- 3 lines on the border section of the Doubs, including one rod without a reel to catch live bait.

In both categories, members of an AAPPMA can fish using:

- One glass jug or bottle with a maximum capacity of 2 litres to catch minnows and other fish to use as bait
- Six drop nets, with a maximum diameter or diagonal measurement of 30 cm, with 27 mm or 10 mm mesh for catching signal crayfish. However, using them is forbidden on the border section of the Doubs.

The lines must be fitted onto rods and equipped with two hooks or three artificial flies at most. On the border section of the Doubs, lines must be equipped with a maximum of 2 hooks.

However, in the Saint-Point, Remoray and Bouverans lakes, the maximum number of hooks per line is set at 10, with a limit of 20 in total for all the lines being used for fishing at one time.

No-fishing zones

- Reserves protected by a prefectoral order.
- Fish ladders.
- Locks.
- Waterways inside buildings.

- On all of the department's navigable public waterways and canals, all fishing is banned at dams and locks and within a distance of at least 50 metres upstream and downstream of them. There are signs specifying these limits, which may differ depending on the type of dam or lock.
- On all of the department's non-navigable private waterways and canals, all fishing is banned at dams and locks and within a distance of at least 50 metres downstream of them, except fishing with a single line.

Fish consumption

Following evidence of all or some species present in certain stretches of river being contaminated with certain pollutants (especially PCB), **the consumption of fish** (of all species) is **forbidden** in the following sections:

- Ognon, from the Montferney dam to the Montbozon dam.
- Allan, along its entire course.
- Savoureuse, along its entire course in the department.
- Lizaine, along its entire course in the department.

The canals and lakes deriving from the aforementioned waterways are subject to the same measures. Tributaries are not affected. These restrictions do not apply to authorised fishing.

Check out the interactive map of the Doubs River on

GEOPECHE™

Including its course, regulations, reserves, launches, etc.

Specific measures

In category 1,

- Attaching hooks above the sinker is forbidden.
 - On the border section of the Doubs, it is forbidden to use barbed hooks and to use the bullhead as bait.
 - Fly fishing is only allowed from the 2nd Saturday in March until the Friday before the 3rd Saturday in May; with a fly rod, a single fly and a single barbless hook or hook with a crushed barb; and on the following waterways or sections of waterways: The Loue River and its tributaries, Dessoubre and its tributaries, Cusancin and its tributaries.
- From the 3rd Saturday in May (start of the grayling season), fly fishing is allowed to take place there using all methods authorised by general regulations (3 fly lures at most, float, etc.), as in the rest of the department.

- To protect salmonid reproduction, entering the water is forbidden from the 2nd Saturday in March until 30 April. This prohibition is extended to the 3rd Saturday in May in the following waterways or sections of waterways (grayling protection): The Loue River and its tributaries, Dessoubre and its tributaries, Cusancin and its tributaries.
- On the border section of the Doubs, it is forbidden from 1 March until 31 May.

- Using cheese, maggots or other insect larvae as bait is forbidden. Furthermore, on the border section of the Doubs, the use of rat-railed maggots and mealworms is forbidden.

- In the border section of the Doubs River, the Goumois AAPPMA offers three salmonid catch and release areas (brown trout and grayling), two of which are exclusively reserved for flyfishing.

In category 2:

- During the period when pike fishing is forbidden, fishing with live bait, dead bait, artificial bait, a spoon lure or another lure that may catch a pike non-accidentally (all artificial lures, like streamers, or wobbed natural baits, like worms) is forbidden. However, this prohibition only applies from the 2nd Saturday in March to the Doubs River between Moulin de Glère (boundary between category 1 and 2) and the D438 bridge at Voujeaucourt.
- On the border section of the Doubs, entering the water is forbidden from 1 March until 15 June, both dates inclusive.
- On the border section of the Doubs, trolling is allowed with a maximum of 3 lines per boat and 2 lines per angler. Please note: use of a motor is forbidden in the Moron reservoir..

In both categories, the following is forbidden:

- Handfishing, fishing with a net and ice fishing.
- Stirring up the water to fish, except in the case of gudgeon fishing.
- Trolling. However, in the Saint-Point and Remoray lakes, trolling with a maximum of 3 lines is allowed on rowing boats only.
- Using the following as bait: fish roe of any kind or origin, species with a legal catching size (even if the bait is this size or larger), species not detailed on the list of officially present species in the waters subject to the freshwater fishing policy, and protected species.
- Releasing the following species, transporting them live or using them as bait: catfish, pumpkinseed, pseudorasbora, Chinese sleeper, spinycheek crayfish, marbled crayfish, virile crayfish; signal crayfish, red swamp crayfish.
- Keeping a fish not caught by the mouth (unless caught in a jug or a bottle).
- Using barbed hooks in catch and release areas.
- On the border section of the Doubs, grayling fishing is forbidden from downstream of the Refrain dam to Clairbief.
- On the border section of the Doubs, only up to 30 minnows may be caught per angler per day.

Specific regulations

On Loue, Dessoubre and Cusancin basins, due to episodes of salmonid death in recent years, in the following measures apply in 2024:

- **Maximum of 2 brown trout per day and catch and release only for the European grayling in the Dessoubre River** (including tributaries and sub-tributaries). **Barbless hooks** or hooks with a crushed barb for fishing with an artificial fly (rod or bubble float) or natural bait (except minnows).
- **Catch and release only for the brown trout and the European grayling in the Loue River and the Cusancin River** (including tributaries and sub-tributaries). Fishing (all methods) is only allowed with **barbless hooks** or hooks with a crushed barb.

Pike catch window in the experimental area:

The implementation of a pike catch window aims to ensure sustainable fishing and preserve the populations of this emblematic species. In the designated sectors below, anglers must follow strict rules regarding the size of pikes they catch. Specimens measuring less than 60 cm or exceeding 80 cm must be released immediately after capture:

- the Doubs from the Pont de la Roche (municipality of Grand-Combe-Château) to the dam of the Pont de Sobey (municipalities of Morteau / Montelebon)
- the Doubs, 700 meters downstream from the church of Bourguignon (municipalities of Bourguignon / Mandeure) to the dam of Prêrière (municipalities of Blussangeaux / Saint Maurice-Colombier).

Size and number of catches

Species	Section	Legal size	Number of catches Per angler per day
Brown trout	The Doubs, from the 558 boundary marker (Bremoncourt) to the departmental border with Jura, excluding tributaries. The Dessoubre: the entire length of the river, excluding tributaries.	30 cm	4 salmonids (a maximum of 2 brown trout from the Dessoubre and its tributaries)
	Doubs border Areas not mentioned	25 cm	
European grayling	The Doubs, from the 558 boundary marker (Bremoncourt) to the D438 bridge at Voujeaucourt, excluding tributaries.	35 cm	
	Doubs border Areas not mentioned	30 cm	Doubs border: 4 salmonids, including a maximum of 2 grayling, with a maximum annual quota of 30 salmonids.
Rainbow trout, Arctic char, Brook trout	All over the department Categories 1 st and 2	25 cm	
European cisco	All over the department, Categories 1 st and 2	32 cm	5 per day, 200 per year
	Category 1	50 cm	2 pikes
Pike*	Category 2 and Drugeon	60 cm	3 predatory fish (pike, zander, black bass), including a maximum of 2 pikes
Zander	Category 2	50 cm	
Black bass	Category 2	40 cm	Doubs border: 3 pikes
Other species	All over the department, Categories 1 st and 2	No size	No restriction

Legal catch sizes: The length of the fish is measured from the tip of its snout to the end of its outstretched tail fin. Specimens smaller than the legal size must be released back into the water immediately, whether alive or dead. Furthermore, transporting a live carp measuring longer than 60 cm is forbidden.

Please note! On the border section of the Doubs, any salmonid or pike catches must be recorded in a fishing logbook.
*Caution, catch window on 2 areas, look at specific regulations.

Fishing seasons

	Category 1	Category 2
General fishing season	Saturday 8 March to Sunday 21 September 2025 both dates inclusive	Wednesday 1 January to Wednesday 31 December both dates inclusive
Specific fishing seasons		
Brown trout Brook trout Arctic char	General fishing season	Doubs border: Saturday 1 March to Tuesday 30 September, both dates inclusive
European grayling	Saturday 17 May to Sunday 21 September, both dates inclusive	Doubs border: Friday 16 May to Tuesday 30 September, both dates inclusive
European cisco	General fishing season	Saturday 8 March to Saturday 1 November, both dates inclusive
Pike Perch	General fishing season*	Haut-Doubs**: Wednesday 1 January to Sunday 26 January, both dates inclusive and Saturday 7 June to Wednesday 31 December, both dates inclusive
Black bass	General fishing season	Doubs border: Wednesday 1 January to Wednesday 28 February, both dates inclusive and Monday 16 June to Wednesday 31 December, both dates inclusive
Zander	Ouverture générale	Wednesday 1 January to Sunday 26 January, both dates inclusive and Saturday 7 June to Wednesday 31 December, both dates inclusive
Silver eel		Fishing forbidden all year
Crayfish (European, stone, white-clawed, narrow-clawed)		Fishing forbidden all year
Edible and common frogs	Saturday 10 May to Sunday 14 September, both dates inclusive	Saturday 10 May to Wednesday 31 December, both dates inclusive
Other frog species		Fishing forbidden all year
Other species	General fishing season	General fishing season

*In category 1, any pike caught between 9 March and 26 April must be released back into the water immediately. This rule is extended to 31 May in all sections classed as category 1 on the Doubs, its tributaries and its sub-tributaries, upstream of Chaillexon Lake.

**Haut-Doubs: The Doubs and its tributaries classed as category 2, including lakes, upstream of Chaillexon Lake: The Doubs from the Labergement-Sainte-Marie bridge to the Oye-et-Pallet dam (including Saint-Point Lake) and from the La Roche bridge to Chaillexon Lake (boundary with the Doubs along the international border), Remoray Lake and its drainage tunnel La Taverne, Raie du Lotaud (including the Frasse and Pont Rouge lakes).

Fishing times

Fishing is forbidden more than half an hour before sunrise and more than half an hour after sunset.

Please note: on the border section of the Doubs, authorised fishing hours are not linked to the time the sun rises and sets. You can consult the table that details these times on the Federation website, in the Doubs border regulations section.
